

DRAUMET impact bits PH2 25mm S2 3 pcs.

D200-36

Opis

DRAUMET PH2 25 mm impact bits are screwdriver bits designed for use with impact screwdrivers and standard drill-drivers. Made of high-quality S2 steel and with a special shape, they are characterized by very high resistance to torsion, which ensures long life and reliability even in demanding working conditions. Their hardness is 58-62 HRC, which increases resistance to wear and guarantees long-term effectiveness.

Thanks to their precise workmanship and 1/4 inch mounting, the bits are compatible with most tools available on the market. Designed for both professional and home use.
